

1. For the home page, some people may not know that there are still more information at the bottom of the page. Is it ok if we add in a down button at the side?

Actually it will look weird if we add in a down button at the side, as the full screen slider is part of our design we agree on before.

There's also an orange page slider on the right side (you can compare with nee soon grey slider), we didn't make it the traditional way (in grey color) is to make the website design to stand out.

2. For the videos, is it possible if we shift the title up a little, closer to the video?
May I know which title you referring to?

3. Under our MPs, can we add in videos? Meaning that beside the Facebook icon, we add in a video icon so that we can add in the video link?
May I know what video you want to add in? Is it Youtube link?

4. For the Interactive map:
 - i. Will you be able to change the word open spaces to link halls?
Yes, we can change 'open spaces' to 'link halls'.
 - ii. For the tabs, can arrange according to - parks, BBQ pits, Link Halls
Yes, should be able to change the sequence.
 - iii. To remove the entire void deck spaces (as my boss explained that all void deck spaces are open for bookings)
Sure, I will ask them to assist for this.
 - iv. the postal code function is not working
I will check with my developer team, so sorry for the inconvenience caused.

5. Also, I have added in a new tab- Maps. Will you be able to help me change the wording to purple colour?

Sure, I will ask my developer team to change the color. As we mentioned in the meeting before, we will advise you to ask us to add in the main menu as it might affect the alignment of the website.
